

ADDITIVES

Adiflu 100

PLASTICIZER-FLUIDIFIER FOR CEMENT MORTARS

Water-reducing plasticizer that provides mortars with better workability, plasticity, cohesion, and an improvement in the water/cement ratio.

APPLICATIONS

Applicable to all types of mortars

Brickwork, masonry, renders, and plastering work

Placement of facing bricks, stone, and terrazzo

FEATURES

01 Better plasticity and adhesion

02 Smoother surfaces

03 Higher frost resistance

04 25% increase in impermeability

05 20% reduction in mixing water

DIRECTIONS FOR USE

Pre-mix the product with a small part of the mixing water and pour into the concrete mixer at a rate of 5 g per 35 kg bag of cement. Mix for 4 to 5 minutes. It is very important to reduce the mixing water.

TECHNICAL DATA

Aspect	Transparent liquid
Color	Amber
Odor	Characteristic
pH	6 ± 1
Active substance	26.4 %

PRODUCT DATA**COMPOSITION**

Surfactants, preservatives, colorants, and distilled water.

COVERAGE

5 g per 35 kg bag of cement.

SAFETY

Biodegradable. Do not ingest. Industrial product for professional use.

S2 Keep out of reach of children.

NOTES

In case of accidental ingestion, call the Toxicological Information Service: 915 62 04 20.
