

ADDITIVES

Adiflu C

SUPERPLASTICIZER FOR MORTARS

Next-generation superplasticizer, plasticizing and air-entraining, substitute for lime in the preparation of mortars. Improves the workability of the mix, facilitates its placement, increases adhesion, eases demolding, and allows for a reduction in mixing water.

APPLICATIONS

Placement of all types of construction

Flooring, stoneware, tiles, facing bricks, and stone

Plasters and coatings

FEATURES

- 01 Better workability and plasticity of the mix
- 02 Higher adhesion to the substrate
- 03 Increase in the impermeability of the mortar by 40%
- 04 Reduction of mixing water by 30%
- 05 Replaces the bag of lime in the mix

DIRECTIONS FOR USE

It is mixed in the mixing water. 50 cc of Adiflu-C is equivalent to the plasticizing effect of a bag of lime.

PRODUCT DATA

COVERAGE

50 cc per bag of cement is equivalent to the plasticizing effect of a bag of lime.

SAFETY

Do not ingest. Industrial product for professional use.

S2 Keep out of the reach of children.
