

ADDITIVES

# Mallasnet

## NON-WOVEN POLYESTER FIBER

Non-woven polyester fiber for the reinforcement of liquid waterproofing. Increases cohesion and maintains the elasticity of the membrane.

### APPLICATIONS

Reinforcement of liquid waterproofing

Joints of walls, floors, and cracks

Drains and chimneys

### FEATURES

- 01 Easy application
- 02 UV resistant
- 03 Increases membrane cohesion
- 04 Maintains membrane elasticity

### DIRECTIONS FOR USE

Use as a reinforcement fabric between layers of liquid applied waterproofing (Elasnet, Sealpul, etc.) on all surfaces to be waterproofed.

**TECHNICAL DATA**

---

Material	100 % polyester
Weight	40 g/m <sup>2</sup>
Longitudinal break elongation	40 %
Transversal break elongation	110 %
Longitudinal break strength	140 N/5 cm
Transversal break strength	70 N/5 cm
Roll dimensions	1 m × 100 m
