

RELEASE AGENTS

# Desmolnet E

## CONCRETE RELEASE AGENT

Fluid mineral oil with special additives that provide great lubricity and a high anti-rust power. Designed for application on all types of molds, whether wooden, metal, or PVC, achieving optimal releases. Due to its special formulation, it is also suitable for treating working rules.

### APPLICATIONS

Wood, metal, or PVC formworks

Treatment of working rules

### FEATURES

- 01 Excellent finish of the released surface
- 02 Does not stain, does not attack the pieces, nor penetrate the concrete
- 03 Its antioxidant additives protect against corrosion

### DIRECTIONS FOR USE

It is used pure or mixed with diesel in a ratio of 1 part of Desmolnet E to 3 parts of diesel.
