

WATERPROOFING

# Net-Vias

## ULTRA-FAST WATERWAY SEALING AGENT

Cement and resin mortar designed to seal waterways and prepare for the application of the waterproof cement Impercem. Sets in 30 seconds, even sealing high water pressures.

### APPLICATIONS

Waterways in concrete walls, stone or prefabricated blocks

Connections of walls to slabs and elevator pits

Groundwater issues

### FEATURES

- 01 Sets in 30 seconds
- 02 High strengths and great sealing capacity
- 03 Seals high water pressures
- 04 Compatible with the Impercem system

### DIRECTIONS FOR USE

Prepare the surface to be worked on: the material must be clean, sound, and solid. Mix Net-Vias with water until a moldable mass is obtained. Wait for it to start heating and apply to the waterway by pressing with the palm of your hand. Wait 30 seconds and remove your hand. Attention: sets in 30 seconds. Use gloves.

### TECHNICAL DATA

Appearance	Gray powder
pH	Reacts with water and is alkaline
Application temperature	From +5 °C to +30 °C
Working time	Approx. 30 seconds
