DEOXIDIZER AND PASSIVATING RUST REMOVER

Acidic stripper for cleaning and deoxidizing metal parts. It allows for excellent finishes by passivating the treated surfaces. Suitable for aluminum, iron, copper, and lead.

APPLICATIONS

Cleaning and deoxidizing aluminum, iron, copper, and lead parts

Treatment by immersion, tank, or rotary drum

FEATURES

- 01 Passivating acidic stripper
- 02 Excellent finishes on metal parts
- 03 Applicable by immersion or spraying
- 04 Chloride content < 0.1 % (UNE-EN 480-10)
- 05 Alkali content < 0.5 % (UNE-EN 480-12)
- 06 Does not contain substances that promote corrosion

DIRECTIONS FOR USE

Apply by immersion in a tank or rotary drums for screws, also by brush or spraying. In all cases, rinse thoroughly with water.

TECHNICAL DATA

Maximum chloride content	< 0.1 %	UNE-EN 480-10
Maximum alkali content	< 0.5 %	UNE-EN 480-12

SAFETY

Do not ingest. Industrial product for professional use.

- S2** Keep out of reach of children.
- S26** In case of contact with eyes, rinse immediately with plenty of water and soap.
